SPECIAL NOTICE

THIS IS JUST A SUPPLEMENTARY SPRING LIST AS A SORT OF "REMINDER" OF SPRING PLANTING

Our GENERAL CATALOG (No. 94) will be sent upon request. It lists and describes more fully our complete offering of—

Apple
Peach
Pear
Plum
Apricot
Cherry
Raspberry
Blackberry
Grape Vines
Rhubarb
Asparagus
Nectarine

Flowering Shrubs
Flowering Trees
Broad-leaf Evergreens
Shade Trees
Ornamental Trees
Roses (50 varieties)
Evergreens for Lawn
Evergreens for Foundation
Perennials
Fertilizers
Hedge Plants
Vines

NO AGENTS

Our representatives and sales people call by appointment only. Last season on at least a dozen occasions we were informed that "our agent" had said so-and-so or had called. This is gross misrepresentation. We sell direct only, assuming all guarantees and responsibility for purchases made of us. This cannot be done in the nursery business except through direct sales.

FREE LANDSCAPE SERVICE

It requires knowledge and experience to properly plan and plant one's grounds. If you have problems let us help you. Our experience for over 90 years is back of our service which can be had without obligation.

Don't wait until too late to avail yourself of this offer.

Call, write, or come to see us about your planting problems.

SEED POTATOES

Through years of experience it has been proven that there is no equal to Second Crop Seed Potatoes for spring planting in this section. Successful gardeners, those who grow potatoes for profit, seldom use anything else.

The potatoes offered are of our own production and true to name. We grow only Irish Cobbler, have them inspected for certification. Each year for seed purposes we plant back from a special test plot only those tubers that come from high yielding, smooth and disease resistant units. This explains why they are better.

Many customers have standing orders for their annual supply of our especially grown and selected seed.

As the crop is small due to the early frost we advise placing your order early.

The potatoes will not be quite as large as usual but there will be no hollow ones and they will go much farther.

PRICES UNTIL SOLD OUT

(Reservations made for later shipment must be accompanied with 10% of purchase price.)

1 bushel (60 lb.)	\$1.50
100 lb. bag	2.50

Larger quantities quoted on application

BLUE GRASS SEED

Poor grass seed is a liability as it contains weeds and chaff. One often infests his lawn with foreign plants by the use of worthless stuff sold under the guise of "Lawn Grass Seed."

Frankly, we do not try to sell seed in competition with the "over the counter" quality. We pay more to the grower and seed cleaner than most of this "packaged" material is retailed for.

We sell only re-cleaned (double cleaned) Blue Grass Seed. We secure it from the best sources and if poured in the hand and examined you will note its heavy weight, its large size and brightness that assures germination and results under favorable conditions.

SPECIAL LAWN MIXTURE—For sowing new lawns or where you have a thin stand we recommend our Special Lawn Mixture. It contains a major proportion of Blue Grass with White Clover and other grasses for quick effect.

Free leaflet on "How to Make a Lawn."

ROSES

Are you rose-conscious? Be up to date with your gardening. A rose bed furnishes flowers from May to November. Nothing else is so continuously in blossom.

We sell only the ones that have done best for us. Plant these tested sorts. We have eliminated many unsatisfactory varieties.

CLIMBING ROSES

PRICES

	Each	3	6
2 yr. No. 1	\$0.50	\$1.50	\$2.70

 Radiance—Best of all pink roses.
 Red Radiance—Bright, rosy red. Best of its color.
 Talisman—Scarlet and gold.

TRI-GEN Combined Spray Treatment

Fungicide—Insecticide—Plant Stimulant

*Complete Protection against Plant
Insects and Diseases*

In the past, Mildew and Black Spot have been most difficult to combat. However, these diseases are now easily controlled with the Tri-ogen Spray Treatment, which gives COMPLETE protection against all diseases and insect pests. It is easily applied and also acts as a plant stimulant—producing vigor in growth with resultant luxurious blooms, heretofore considered impossible. The Tri-ogen Spray Treatment applied weekly, from early season until late frost, makes it possible for the amateur to achieve the success, in many cases, comparable to the professional grower.

TRI-GEN was officially adopted for the exclusive protection of the Garden of 16,000 Roses, at the CENTURY OF PROGRESS, Chicago World's Fair.

D. Estate Kit (makes 128 gallons)	20.00

STRAWB

Cultural Directions

Late March or April is the chosen time to plant strawberries. Fall planting usually is a complete failure. Plant early to avoid failure.

Strawberries respond to good soil, and you should choose a fertile location or garden plot, free of sod and weeds, as white grubs invariably follow these. Prepare the ground very thoroughly.

The rows should be drawn three and a half to four feet apart on strong ground and the plants set fifteen to twenty inches apart in the row.

CULTIVATION

For summer care keep the ground constantly stirred and free of weeds. Moisture preservation by dust mulch will conserve the vitality of your plants and produce a fine matted row. Keep the hoe and cultivator busy.

Winter protection by mulching with clean straw after the ground is frozen is advised. Do not apply too heavily and smother the plants. Leave on during the fruiting season, as it conserves moisture and keeps the berries clean.

PRICES

Hillennmeyer's "Full of Pep" Strawberry Plants

When ordering, remember our plants are not to be confused with stock which has been shipped long distances, is in the mail several days and half dead before received. Order our full of vitality plants and avoid disappointment.

We will be pleased to make selection if left to us.

300, 500, or 1000 plants for a small, medium or large family. Any selection permitted except Everbearing Varieties.

Shipped either by Express or Parcel Post.

HOW TO PLANT STRAWBERRIES

Complete planting instruction booklet sent with every order

TOO DEEP TOO SHALLOW JUST RIGHT

ERRIES

Strawberry Varieties

PREMIER

No strawberry has ever been so deservedly popular. It is perfect flowering, a good plant maker, and frost resistant. Its best points, however, are its ability to set an extra large crop of berries and mature every one. Few small berries are found even at the last picking. The fruit is large, bright in color and high in quality. The leading berry for home market, supplanting all other kinds. No berry ever listed has earned such a deserved place in the variety list. We recommend it as the BEST early and mid-season variety. In small plantings use Premier only.

BLAKEMORE

This follows Premier in ripening period. A variety that is taking the place of the old standby, Senator Dunlap. Berry very firm, good table quality and has no superior for canning or preserving. Good plant maker, especially adapted to poorer or lighter soil. We consider it one of the real discoveries. It is recognized as a superior home and local market berry.

SENATOR DUNLAP

Its one fault lies in its habit of making too many plants. Dark rich red fruits ripening in mid-season, of excellent quality. Heavy annual producer. Must be kept thinned out in the row, otherwise too many plants and small size fruits will result.

GANDY

Still the best late berry. Robust plants that fruit on strong stems, blossoming exceedingly late and thus missing frosts that often kill the early bloomers. Considered the best preserving berry by many and is also very fine as a table variety. Plant with confidence.

AROMA

As Premier, Blakemore, and Fairfax overlap its season of ripening and are so superior, we are discontinuing Aroma.

DORSETT

One of the most satisfactory varieties that has been introduced in years. Its high quality, light colored berries are excellent both for home and commercial purposes. Ripens a few days after Premier and while by some is thought better we are not yet ready to give it preference. It is a good plant maker.

FAIRFAX

As Fairfax and Dorsett were sent out at the same time and ripen along with Premier they are generally compared with each other. We have found that Fairfax ripens a week or more after Premier, is of darker color, especially when ripe, and of firm texture. It so overlaps Aroma that we prefer it to that variety both as to quality and production. While excellent and can be planted to take the place of Premier we are not yet willing to admit its superiority. However, you can plant with confidence.

FRUIT TREES

Hillennmeyer trees are propagated from the best bearing strains. There is a shortage of good fruit trees. With favorable weather here we have the finest lot in years. Every tree is guaranteed true to name and to arrive in prime order.
